No. (KBAO- 09-00X)	Date Initiated	Document Title	Type of Document	Date FONSI Approved	Description of Project
1	Spring 2009	Orleans Transportation and Road Restoration	FS EA Adoption	03/17/09	As part of the Klamath Watershed Restoration Grant Program, Reclamation is funding the implementation of a transportation management program that consists of varying road treatments including maintenance and decommissioning. The project was being performed to enhance anadromous fish habitat and reduce the risk for spread of Port-Orford Cedar Root Disease.
2	Spring 2009	White's Gulch Migration Barrier Removal Project	Reclamation drafted EA and FONSI	06/24/09	As part of the Klamath Watershed Restoration Grant Program, Reclamation is funding the replacement of a culvert with a bridge on Siskiyou County Road No. 2E002. The project is being performed to allow complete access to 3.5 miles of upstream spawning and rearing habitat for all life stages of Chinook and coho salmon and steelhead trout.
3	Summer 2009	Klamath Basin Ecosystem Restoration Office Projects - Sprague River Meander Reactivation	USFWS EA Adoption	07/10/09	As part of the Klamath Watershed Restoration Grant Program, Reclamation is funding the implementation of a channel restoration project for a portion of the Sprague River. The proposed channel restoration project will consist of reconstructing the approximate historic channel, plugging the existing channel, and installing large wood habitat structures, vegetated soil lifts, and backwater habitats. The project is being performed to restore fish habitat, restore ecosystem functions, and increase base flow habitat.

4	8/3/2009	Klamath Basin Ecosystem Restoration Office Projects - Barkley Springs Habitat Restoration	USFWS EA Adoption		As part of the Klamath Watershed Restoration Grant Program, Reclamation is providing funding to rehabilitate the natural spring brook environment by creating approximately 1 acre of marsh and riparian habitat and 1,500 feet of meandering spring brook. The project is being performed to reestablish spawning populations of suckers, increase populations of endemic species, provide for existing park uses, provide for existing irrigation withdrawals, provide for existing boat use, and protect cultural resources.
5	Summer 2009	Lower Klamath Sub-Basin Erosion Control Project	Reclamation drafted EA and FONSI		As part of the Klamath Watershed Restoration Grant Program, Reclamation is providing funding to decommission approximately one mile of road and apply additional erosion control measures to the road and the stream crossings associated with the road. The project is being performed to reduce the potential for delivery of sediment to prime spawning and rearing habitat for coho salmon and to prevent the erosion of natural stream channels due to increased flow volume.
6	8/12/2009	Klamath Basin Ecosystem Restoration Office Projects - Tule Smoke Hunt Club Restoration Project	USFWS EA Adoption	10/15/09	As part of the Klamath Watershed Restoration Grant Program, Reclamation is providing funding to restore connectivity between the Klamath River and the wetlands on the Tule Smoke property and improve water quality in the Keno Impoundment. The project is being performed to restore flows through the wetland to create diverse wetland habitats necessary to meet the needs of all the fish and wildlife species that depend on this resource.
